This was a magnificent event and the organisers, their sponsors and the many volunteers and people of Ledro made it an event to remember.

At this championship, all the sailors were winners. They arrived with good

team racing skills but after 4 days of morning clinics from Chris Atkins and nearly 130 races, everyone learnt new skills and became teams who could hold their own in any Optimist team racing championship in the world.

Next year this event will again be held in Ledro and 16 teams, qualified from the European Fleet Racing Championship in Poland, will have this incredible opportunity to hone their team racing skills and attempt to become European Team Racing Champions.
